SR 121 (RRR Design) from Union County to South of I-10

Location: Baker County, FL (Baker County)

Owner: Florida Department of Transportation (FDOT) – District 2

Markets: Transportation

Services: Highway and Roadway Design

Project Description

As part of FDOT's long-term SR 121 corridor improvement plans, this project, located in Baker County, enhances safety and mobility for all modes of transportation while increasing the service life of the pavement. The enhancement includes the resurfacing, rehabilitation, and restoration of the existing roadways. Other improvements include base work, shoulder widening at various locations, sidewalk replacement, drainage improvements, guardrails, signing and pavement marking, and retrofitting signalized intersections.

NicNevol Engineering was part of the consultant team that provided no-passing analysis, maintenance of traffic assessment, and plans review quality assurance.

NicNevol Responsibilities

- Performing no-passing analysis
- Constructability Plans Review

“

Delivering engineering
expertise that supports safer,
stronger infrastructure.

”
